## Lance Turk joins J.P. Instruments team

**Costa Mesa, CA, June 13, 2008:** Lance Turk, (well known as the former President of Vision Microsystems) has accepted the position of Director of Product Development at JP Instruments. Lance will apply his extensive experience in the field of microcomputer based instrumentation and business development to enhance JPI's already strong position in the electronic instrumentation market. Joe Polizzotto, president of J.P.Instruments, said "we now have a truly merged Vision Microsystems. Lance's experience and enthusiasm will be a welcome and exciting addition to the JPI team". Lance retired from the position of president at VMS, and subsequently took a position in aerospace, managing interior reconfiguration of Part 25 airliners and custom business jets for the last two years. Lance stated; "I have truly missed the customers, and camaraderie that is found in the Part 23 world and also the technological fast pace and flexibility that is found in smaller corporations. I look forward to being an integral part of furthering technology in the general aviation marketplace and the success of JPI". Lance will be present at Airventure 2008 to renew and cultivate customer and OEM relationships. Stop by the JPI booth's 1071, 4123 and welcome Lance back.

**For Release 9 a.m. PDT, June 13, 2008**
